

SAFE AND EFFICIENT MINE CLEARING MACHINE

SAMSON 300

- SAMSON is special designed machine for demining and not construction machine remade for demining
- maneuverability and flexibility, owing to the articulated mechanism of the chassis and flail unit
- small weight of the vehicle and huge power on the flail unit enable big capacity of clearing and possibility to overcome also bridges with low load capacity
- university of the machine with FLAIL / TILLER, CRANE and SMALL FLAIL and ladle to remove material from the area that should be demined.
- the machine offers the driver full protection, even in explosions of **anti-tank mines**, which has been proven in practical work several times and also tested at an authorized institution.
- can be easily transported with an ordinary truck
- possibility of independent driving on public roads
- remote control is also included in the basic machine

Power	300 HP
Drive system	hydrostatic drive for vehicle and flail/tiller
Weight	10.800 daN
Dimensions LxBxH	7.610 x 2.350 x 2.820 mm
Speed working/street	0÷4 / 0÷20 km/h
Clearing wide track	2.530 mm
Control from	cabin and remote

CRANE WITH BUCKET

CRANE WITH SMALL FLAIL

COMFORTABLE AND SAFE CABIN

SAMSON WITH TILLER
